Report on Racial Profiling and Officer Involved Shootings in Dallas, TX (2002-2013)

For more information, please contact:

Stephen Benavides, Dallas Communities Organizing for Change, dallasforchange@gmail.com

November 19, 2013

Introduction: In August 2013 Dallas Communities Organizing for Change (DCOC) submitted Open Records Request 2013-09685 to the Dallas Police Department requesting data on all officer-involved shootings from January 1, 1987 through August 11, 2013. The records released responsive to the request were incomplete, but did provide enough data to produce a preliminary numerical and statistical report of officer involved shootings in Dallas, TX from 2002 through mid 2013. The causes and individual circumstances of each shooting are not reported here, although DCOC has requested and is awaiting a response from Dallas Police for each "Use of Force Report" from 2007-2012. The data provides a clear picture of overwhelming bias in the application of deadly force against Black and Hispanics, and makes a striking argument that Dallas Police have institutionalized racial profiling.

Methodology: Open Records Request 2013-09685 was submitted under Texas Open Records Act, Chapter 552 of the Local Government Code via email on August 12, 2013 to the Dallas Police Department Records Division Open Records Unit located at 1400 South Lamar St. Dallas, TX 75215. The invoice date for the records was September 13, 2013, and records were released on October 14, 2013. DCOC specifically requested "information relevant to Officer Involved Shootings, and/or shooting deaths of civilians by Dallas Police from January 1, 1987 through August 11, 2013..." Included in the results were Internal Affairs case numbers, date of occurrence, service number, precipitating factor(s), officer assessment of situation, service rendered, subclassification, name, race, sex of the shooting victim, name, race, sex of officers involved, and allegations of police misconduct if any.¹

For the purposes of determining any pattern and practice of racial profiling of the victims of officer-involved shootings, we used "sub-classification" as a determinant factor due to it detailing whether

¹ Dallas Police Open Records Request 2013-09685 is included at the end of this report.

the individual was killed, injured, or not injured. Sub-classifications "suspect killed" and "suspect injured" were coded as "Victim Killed (Y/N)". Race identifiers were implemented using data provided by the Dallas Police, where Black (B), White (W), Hispanic (H), Asian (A), and Other/NA were paired with a numerical ID Code ranging from 1-8. ID Code 1 through 4 apply specifically to fatal officer involved shootings, where 1 = White (W), 2 = Black (B), 3 = Hispanic (H), and 4 = Black and Hispanic (BH). ID Code 5 though 8 apply to non-fatal shootings, where 5 = White (W), 6 = Black (B), 7 = Hispanic (H), 8 = Black and Hispanic (BH*), 9 = Asian (A), 10 = Animal (Animal). Female is coded as (F), and Male is coded as (M). Each set of observations, fatal and non-fatal, were analyzed exclusive of one another to determine rates of officer involved shootings by race, sex, and date of occurrence. Analysis begins on July 20, 2002 and goes through July 18, 2013.

Findings: Between July 20, 2002 and July 18, 2013 there were 197 total officer-involved shootings as reported by the Dallas Police Department. Fifty-eight of those shootings resulted in fatality, where the sub-classification "suspect killed" was noted in the records. Black and Hispanic fatalities account for 43 (74.13%) of all fatal officer involved shootings. 33 of those who died at the hands of law enforcement were Black (56.89%), 10 were Hispanic (17.24%), and 15 were White (25.86%). Out of the 197 officer-involved shootings, 139 were non-fatal, where the sub-classification "suspect injured" or "non-injury" was noted in the records. Black and Hispanic non-fatal officer-involved shootings account for 112 (81.15%) of the 139 total incidents reported. There were 71 Black (51.07%), 42 Hispanic (30.43%), 13 White (9.42%), 1 Asian (0.72%), and 12 Animal (8.69%) non-fatal shootings reported. Overall, there were 156 Black and Hispanic (79.18%) individuals involved in an officer-involved shooting, with 28 White (14.28%) victims during the same time period. 187 (94.92%) of total officer involved shootings victims were Male, with 57 (98.27%) ending in fatality. 6 (60%) of the female victims were Black and Hispanic.

Conclusion: The 56.89% fatal and 51.07% non-fatal officer-involved shooting rates for Black (B) are more than double the 2010 Demographic Profile Data provided by the U.S. Census Bureau, which shows that African Americans compromised 25% of the total population of the City of Dallas.⁴ The combined Black and Hispanic populations of the City of Dallas are 67.4%, which is less than the 79.18% of all officer involved shootings for the same Black and Hispanic communities of color. Comparing fatal (74.13%), and non-fatal (81.15%) Black and Hispanic shootings, the pattern holds. The data provides a clear picture of overwhelming bias in the application of deadly force, and confirms without a doubt, that the Dallas Police Department has engaged in an illegal and disproportionate pattern that violates the constitutional rights of communities of color.

² Asian (A) and Animal (Animal) ID Codes did not occur in the records and are omitted from the fatal statistic.

³ There are several other non-fatal sub-classifications, and are omitted as part of this report.

⁴ 2010 U.S. Census Bureau, http://quickfacts.census.gov/qfd/states/48/4819000.html

Dallas Police Officer Involved Shootings Breakdown (2002-2013)
